

## ORDER NOW!

Plants are reserved upon receipt of your order and will be shipped at the proper planting time. We are pleased to accept orders for plants until the last realistic planting date in your area. For northern gardeners, this generally means late May, weather permitting. Gardeners in the south are encouraged to order early so we can deliver while still cool.

## Soil and Fertilizer

### Slow Release Fertilizers

This is the same fertilizer we use in our greenhouses. Apply the proper amount at planting and your plants' fertilizing needs should be set for 3-4 months. The fertilizer will break down a little with each watering to provide continuous feeding. If you are using liquid fertilizer in addition, cut the rate in half. Note: Shallow containers and hanging baskets use one half the recommended rate of fertilizer.  
1 ounce bag: 50¢/Free shipping

### Soil Mix For Containers

This is Mischel's own soil mix. After many years of adjustments, we are very happy with the plant growth results from our soil. Our mix contains sphagnum peat moss, perlite (white stuff), vermiculite, fine limestone, and all the needed trace nutrients. Our mix is designed to help retain moisture and keep the soil loose and aerated.

Note: Soil may be shipped separately from plants.

2 gallon/4 pound bag: \$10/Free shipping
